

Ventrilo Setup:

Go to ventrilo.com and download the Ventrilo version for your computer

Run Ventrilo The arrows at the right of the blank box are the edit keys

Edit User Name Select: New

Enter: your IGN with your Clan Tag with (In Game Name with your =STS= tag)

Example: [STS] LastQuencher then OK

Edit Server click NEW add a Name (you can use anything here)

Example: Seal Team Six then OK

Add Hostname or IP: stsb2.typefrag.com Enter

Add Port number: 9590 Enter

Password: You will put your password here **AFTER** it has been set up

LEAVE IT BLANK FOR NOW

Click OK and then hit: Connect

GO TO SETUP then click on the Hotkey block and select the key you want to transmit with.
I use Left Alt

The default is Keyboard Left Ctrl (Control)

When I catch you on ventrilo, We will set up the Chat Rooms for you. You can also adjust your Volume in Setup

After I catch you on ventrilo We will set up your Password you want to use, then you can Disconnect and EDIT the Server Setting and add your Password click OK and Connect, You will can click on the Rooms to move to it. Use the Comment box to put something after you name if your going to be AFK

You can contact me at sealteamsixbf2@gmail.com to add your IGN and password in a private message

Enjoy: [STS] LastQuencher
